

Emporia Public Library, 2001

The LWVE supports the development of Emporia's public library facilities and services sufficient to serve the city and county. Specifically the League supports:

- Continued outreach efforts and increased library visibility and publicity throughout Lyon County.
- Continued cooperation with and outreach to other county libraries.
- Regular review of financial support from city and county governments. If county residents are to receive as comprehensive service as city residents, the county should contribute funds on a more equitable basis.
- Continued review of both staff and public technology needs.
- Continued communication and collaboration efforts with community constituents such as Emporia Main street, community businesses, Lyon County Historical Society, Emporia Arts Council, schools, etc.
- Growth in the number and diversity of library programs for the entire population including the underserved (handicapped, Spanish-speaking, elderly, etc.).
- Continued hiring and training of a diverse professional and para-professional staff.
- Encouraging a high profile and active Friends of the Library organization.
